PRODUCT FAMILY INFORMATION

Low Voltage Halogen AR111 Reflector with an Aluminium 111mm diameter and an integrated anti-glare shield over the capsule. This lamp produces a brilliant accent light and has a cap for reduced glare and ease of handling. The burner has an axial filament for optimum distribution of light and the glass capsule contains a UV filter. Thanks to an aluminum-coated reflector the lamp has a drastically reduced thermal load and the entire lamp contains no mercury. Used for general illumination in shops, restaurants, hotels, offices, public buildings and shops.
