Function description

Connected lighting – the top-class light cube. The modern L 845 SC wall light from the Cube Pro range is equipped with a 160° high-frequency sensor, covers a detection radius of up to 5 m and can be adjusted digitally with absolute precision. The light is made of high-quality aluminium and features a sophisticated cube design. Offering 3000 K and (lumen) lm, the wall light sets brilliant accents around the house, while also providing safe yet stylish direction at all times. Bluetooth Mesh and the STEINEL Connect app ensure the wall lights can be commissioned, set up and networked wirelessly, rapidly and easily. Thanks to the interconnected group function, visionary light makes it very pleasant and comfortable for residents and visitors alike to spend time outside. The attractive wall light features a soft light start and basic light function (10-100%), as well as dimmable main light (10-100%). To summarise, this is the ideal lighting solution for needs-based illumination along a building. Requiring only 9 W W, this designer light is also surprisingly economical. The attractive wall light is also available without a sensor (L 845 C).
