

# Take a closer look

Besides being new and compact, the Actassi S-One carries a number of clever innovations and improvements.

The smart bridle integrates and locks cables, automatically providing 360° earthing

U-shaped central cable entry for optimized performance

The hidden IDC reduces the risk of damaging cables or fingers during installation

The IDC housing made of insulated plastic eliminates short-circuits between conductors and metal body

Close and re-open the connector without any tools

# Actassi S-One RJ45 connectors

Fast and troublefree network connectivity in System M

P117491

## It is about speed

The one-piece design of the S-One connectors makes the installation fast and trouble-free.

P127924

When installing a network solution, it's wise to focus on the final performance of the complete system, instead of being annoyed at malfunctioning parts. And now you can!

With the new range of Actassi S-One RJ45 onepiece connectors, we have turned a usually bothersome component into a most efficient co-worker, handling connections up to 50% faster.

# Fast installation in three steps

The one-piece design of the S-One connectors makes the installation fast and trouble-free.

A compact one-piece connector

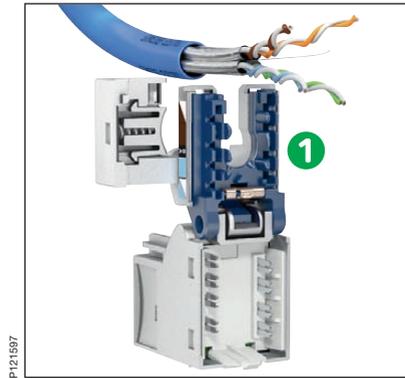

Without any loose parts the S-One connector is more compact, easier to handle and faster to connect. The connector is delivered open, ready to connect. It has an automatic 360° cable earthing, a simple locking termination and a very smart locking function.

The robust onepiece design is suitable for all applications, and in the S-One range you'll find both shielded and unshielded connectors of all categories.

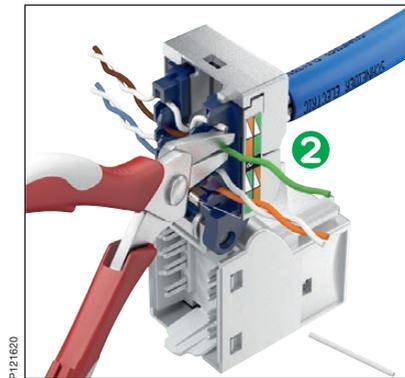

Actassi S-One insert

# Ready, steady, done!

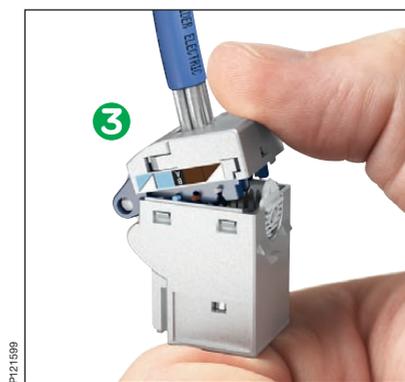

P121597

**1** Insert the cables in the central U-shaped entry

P121620

**2** When the smart bridle locks the cable it will automatically provide 360° earthing

P121599

**3** Shut the connector. A click confirms that it is locked into its firm and reliable position

# Design

Match the network installation with the surrounding designs of System M 2.0.
