## Product Data Sheet GWJ5111B

**JOINON Range** 

Type 2 mobile connector, compliant with IEC 62196-1 and IEC 62196-2, designed for charging electric vehicles compliant with IEC 61851-1, equipped with an external rubber coating on the lower portion to improve grip and facilitate insertion in the charging inlet. It is supplied pre-wired with a smooth 5 m cable. This product is also equipped with a rubber cable gland and has a IP55 protection rating if inserted in its casing or covered with the protective insulating cover. Customisation options are available for brand, colour and cable length, as well as for cable type and head.

| Handle colour               | Grey (RAL 7035)      | IP degree             | IP55 (with sheath or cap)               |
|-----------------------------|----------------------|-----------------------|---|
| Overmold colour             | RAL 7016             | Mechanical resistance | IK10                                    |
| Cable gland and plug colour | Black RAL 9005       | Glow wire test        | 850°C (active parts) / 650°C (external) |
| Number of poles             | 5 (L, N, PE, CP, PP) | Working temperature   | -30 +50 °C                              |
| Rated current               | 20 A                 | Stocking temperature  | -40 +70 °C                              |
| Rated voltage               | 500 V                | Wiring section        | N/A                                     |
| Rated frequency (Hz)        | 50/60 Hz             | Insulation voltage    | 500 V                                   |
| Cable length                | 5 m                  | Cable colour          | Black                                   |
| Cable type                  | Smooth               | Cable terminals       | Single contacts with ferrules           |

## **TECHNICAL SYMBOLOGY**

IP55 (with sheath or cap) IK10 850°C (active parts) / 650°C (external)

650°C (e)
