Bell symbol for splashproof control switches and splashproof illuminable push buttons

700-30100

4 year warranty

This square transparent window is equipped with a bell symbol and is used in combination with splashproof control switches and splashproof illuminable push buttons. The window is clicked into the plate and distributes the light when the control switch or the push button is illuminated.

Technical data

Bell symbol for splashproof control switches and splashproof illuminable push buttons
Square, transparent window equipped with a bell symbol for splashproof indicator switches 10AX/250V~ and splashproof illuminable push buttons 10A/250V~. This transparent window is clicked into the central plate and ensures the dissipation of the light when the indicator switch or the push button is illuminated. The transparent window is equipped with an indelibly indicated bell symbol. It is made of transparent, colourless polycarbonate.
